Voting Result: 3-0

**Summary:**

Add new LampArrayKind values for Microphone and Speaker devices.

**Background/Scenario:**

More device manufacturers are shipping peripheral headsets with RGB LEDs in them. This HUTTR will allow those manufacturers to correctly and fully represent those types of devices to Windows.

**Proposal:**

Add new LampArrayKind (Microphone) to describe a LampArray integrated into a microphone.

Add new LampArrayKind (Speaker) to describe a LampArray integrated into a speaker.

Add to Table 26.2.1 LampArrayKind Values

Name	Description	Value
LampArrayKindMicrophone	LampArray is part of a standalone microphone.  <i>Note: This is a specialization of LampArrayKindPeripheral</i>	0C
LampArrayKindSpeaker	LampArray is part of a standalone speaker.  <i>Note: This is a specialization of LampArrayKindPeripheral</i>	0D
