Summary:

We would like to propose a new Application Collection to identify an assistive input device.

Background:

There is a class of devices that are available in the market that are used for helping users of special needs who can see the computer display and manipulate simple inputs. A standardized top level collection is needed to identify such devices.

Proposal:

Changes are in the "4. Generic Desktop Page (0x01)"

New usage to be added to Table 6: Generic Desktop Page.

| | | | |
|-------|-------------------|----|-----|
| 0A | Assistive Control | CA | 4.1 |
| 0B-2F | Reserved | | |

Additions referenced by the above usages:
Section 4.1 Application Usages

Assistive Control
assistive control

input control to

CA - A manual control or cursor device. An

device may consist of buttons or a pointing

communicate.
